

D. Krajtsir

Boston Herald
Aug 12 - 1849
P2-1

Lectures about Hungary
He said, "the Magars came
from the castle of Ung-Var,
near the confines of Poland
and migrated south, hence
the Hungarian was derived
- not from the ancient Huns,
but from the Castle Ung-Var."

"Small audience, but some of our
most eminent citizens"

"The introductory lecture though
full of instruction, was not so
interesting as we may expect the
others to be."

Hungarian meeting postponed
