

## Gerster E

"A more exquisite, crystalline voice never refreshed the ear than that of the Hung. prima donna when she visited Amer. in her youth, and the Magnetism of simply ~~being~~ imparted to most of the personages she portrayed a fascination that for all as an actress could scarcely have invested them with. The cause of the songstress' sudden decay remains in mystery; but when Mme G. returned to the U.S. in the prime of life she was but a wreck. One occasionally, however, hears of her re-emergence in public.
