Terenc Gyorky

Yours letter, requesting information about

the Medical Doctor's Diploma of F. Gy. is

answered as follows:

The above named - as I already informed
several (U.S.) authorities upon their requests -
did not receive a Med. Dr's Diploma
at our University. He started his medical
studies at the Faculty of the Szeged
Medical University. At the Budapest
University ~~he~~ was not a student. ↓

F. Gy. requested the verification
of his studies from the Szeged Medical
University and he received the answer
from there.

During World War II, in Dec. 1944

(2) together with the students of the two final years of the Budapest University's Medical Faculty, the medical students of the provincial universities (Debrecen, Pécs, Szeged) were also transferred to the City of Halle, Germany. With the students several univ. professors were also transferred. ^{The students} They finished the IInd semester of the 1944/45 school year in Halle.

Because ^{of} the ~~was~~ ~~needed~~ many physicians ^{needed} ~~urgently~~, the ~~hardly~~ few months' instruction was entirely illusory and worthless. For this reason, after the war an edict was issued by the Ministry of Public Instruction, which invalidated the examinations passed in Halle and the so-called "Halle Doctor's Diplomas" which were granted

③

After the war our Univ. received back all ~~the~~^{out} registries of the ^{Univ.} examinations and others which were transferred to Halle.

But the name of F.G. is ~~not~~^{nowhere} mentioned in these registries. On this account it can be stated that the above named did not receive a M.D. Diploma even in Halle.

On the other hand, those students who ^{during the war} were transferred to Halle, after the war ~~the~~ had to continue their Univ. studies, where ~~they~~^{they were} ~~the~~^{broken} ~~up~~^{off} at the time of ^{the} transfer.

On the basis of the above F.G. has no valid M.D.'s Diploma in Hungary.

Bpest, 1976 feb. 13.

Dr F. Graf
Dean

Seal: Semmelweis Medical Univ
Dean of the ~~Medical Faculty~~ Faculty of Gen. Medical Science
