

Kis lak áll a nagy Duna mentében;  
Oh mi drága e lakocska nékem!  
Könnyben úszik két szemem pillája,  
Valahányszor emlékszem reája.

Bár maradtam volna benne végig!  
De az embert vágyai vezérik;  
Vágyaimnak sólyomszárnya támadt,  
S odahagytam óslakom s anyámat.

My dear friend, Kedves regi Baratom!

Allow me to write this quickly in English as I want to get it out to you tonight, as I brought some of the pictures from my camera shop the other day and wanted to send you some of them, as I promised.

You certainly have a WONDERFUL MEMORY...to remember that I went to lunch with you...something like over 30 years ago!

Meanwhile, since that time, I have a family, a son of 31 years of age and work at practically two jobs. You know how it is when one gets into a home and other obligations to be tended to. However, I have been quietly assembling much information on Kossuth in America, since I at one time thought I would be a professor in History of Europe...but during the depression here in the States I had to go to work when I was 15 $\frac{1}{2}$  and get all my schooling at night, including my degree at the university.

But in my spare time I never gave up my research on Kossuth...and so with only so many years to go, I thought --as I did 40 years ago--- that I would donate all my research to the Országos Szechenyi Konyvtar, and last year was the first time I brought some material to them. Of course I was on a special trip for CPS in Rosemont, but took several days out to visit Budapest and bring the material with me. And that is what I also did last September. /Thought you might be interested in the Nov-Dec. 1973 OSzK Hirado where there was an article that I zeroxed for some of my friends, and I am enclosing a copy for you./

You mentioned that you also had material on Kossuth but that you were donating it to Szeged. Am I right? Please write me when you can es legyen szives irjon magyarul.

regi oszinte baratsaggal:

*Huzsianyi István*

P.S. Perhaps we may have a national Shriner Convention in D.C. again, as in prior years, and I visited Almas Temple, since I belong to Medinah Temple in Chicago for some years now and a member of a marching unit.

U.i. Mellekellek a kepeket: Tekercs szám #9769/1 -2 -3 -4 (Oda is fogok küldeni Pestre mert meg több kepeket készítettem a konyvtarban.)
