Washington, D.C.

My Dear Ödön:

Attached here you will find six copies of The New Hearth. This little magazine is a monthly devoted to the newest science, Geriatrics, and the oldest science in the world, how to take care of old people. As you will see in the masthead, it is devoted to the interest of the Nursing Home Operators. I am editing it.

In November the magazine celebrates its first anniversary. We are asking prominent people all over the country to favor us with a few lines congratulating the paper and having a few good words to the Nursing Home Operators. There are lawyers, doctors, welfare people, even several governors among those who have already sent in their messages.

I am asking you, as an old friend, to do the same for the magazine. You need not write more than just a few lines. I'd really hate to take up much of your time, but please send those lines to our publishing office, 31156 Detroit Rd. Westlake, Ohio as soon as you possibly can because we are approaching the deadline dangerously.

Thanking you in advance for your kind co-operation, I am,

Sincerely yours,

*Linak Piöta*
