**Psychosexual  
Functions in  
Women**

THERESE BENEDEK, M.D.

Institute for Psychoanalysis,  
Chicago

Foreword by

FRANZ ALEXANDER, M.D.

A NEW approach to problems of female sexuality, this volume sheds positive light on emotional disturbances of pregnancy, motherhood, and the climacterium. Histories of 15 married and single women, correlating psychoanalytic findings with data on hormones, lend insight into many conditions ranging from chronic inhibition to severe maladjustments. 42 tables. \$10
